Smart contract (source code and bytecode)
W1: CodeBERT whole contract in 512-token windows
W2: Forta-style lexical rules (fixed weights)
W3: CRPWarner bytecode flags (W3lean = 0.8 or 0.2)
Gate: W1 in [ℓ, h]?
No
Yes
Final score = W1
Either path: rug pull if final score ≥ τ
Final score = (W1 + α W2 + β W3lean) / (1 + α + β)
